MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS, INC. 1616 P STREET, N.W. WASHINGTON, D.C. 20036 (202) 797-5390

TONNAGE INDEX INCREASES IN DECEMBER

General freight carrier tonnage in December, 1983 registered a gain from November according to the ATA Truck Tonnage Index. At a level of 139.0(p) with 1967=100, the December tonnage is 1.6 points (1.2 percent) above November's 137.4(r). General freight tonnage has changed very little since July in contrast to the gains registered over the eighth month in a row that tonnage has exceeded levels for comparable months of 1982.

The actual tons reported by motor carriers in the ATA survey increased from 6,793 million tons in November to 6,803 million tons in December of 1983. Actual tons increased 0.1%. Adjustments for variations due to seasonality and the number of working (trading) days increased the December index level to 139.0(p).

From November to December of 1983, Industrial Production increased 0.5% compared to the adjusted general freight tonnage index increase of 1.2%.

These findings were announced today by the American Trucking Associations, Inc. (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the companywide operations of Class I and II motor carriers of general freight. Index coverage represents in excess of one-half of the tonnage moved by this type of for-hire motor carriers of property subject to Interstate Commerce Commission regulation.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.

Cumulative tonnage for 1983 increased 5.9 percent compared to the same period in 1982 for the carriers in the survey.
